

### 6.3 Bulk Density

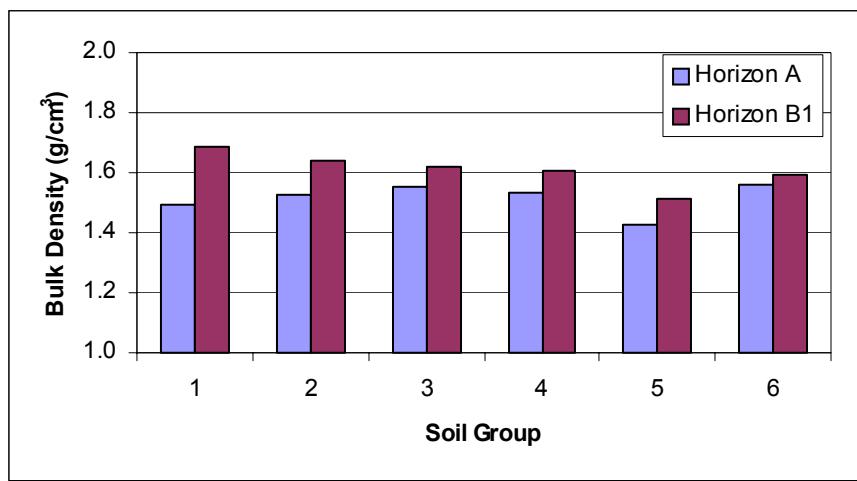

Soil bulk density of Horizons A and B1 was measured at 348 points across 79 sites. Results are summarised in Tables 6.10 and 6.11. Horizon A of Groups 1, 2 and 3 has larger standard deviation compared to Horizon B1. For Groups 1, 2 and 3, bulk density of Horizon A has larger variability within group compared to those of Horizon B1. Table 6.12 shows bulk density of soil types.

**Table 6.10 Bulk Density of Horizon A**

| Soil Group | No. of Points | Bulk Density ( $\text{g}/\text{cm}^3$ ) |      |      |      |            |      |      |
|------------|---------------|---|------|------|------|------------|------|------|
|            |               | Mean                                    | Std. | Min. | Max. | Percentile |      |      |
|            |               |   |      |      |      | 25         | 50   | 75   |
| 1          | 78            | 1.49                                    | 0.17 | 0.96 | 1.80 | 1.39       | 1.48 | 1.62 |

Figure 6.18 shows average bulk densities of Horizons A and B1. Group 5 has the lowest average bulk density of Horizon A. Except for Group 6, the average bulk density of Horizon B1 shows a decreasing trend with soil group. Horizon B1 has higher average bulk density than Horizon A.

#### 6.4 Soil Electrical Conductivity (EC)

The soil EC of Horizons A and B1 was measured in a 1:5 soil water suspension at 261 points across 79 sites. Results are summarised in Tables 6.13 and 6.14. Group 5 has the highest EC of both Horizons A and B1 among soil groups. The EC of Horizon A is similar to that of Horizon B1 for all soil groups except Group 1.

**Table 6.13 EC of Horizon A**

| Soil Group | No. of Points | Electrical Conductivity (dS/m) |      |       |      |            |      |      |
|------------|---------------|--------------------------------|------|-------|------|------------|------|------|
|            |               | Average                        | Std  | Min   | Max  | Percentile |      |      |
|            |               |                                |      |       |      | 25         | 50   | 75   |

#### 6.5 Soil pH

Soil pH of Horizons A and B1 was measured in 1:5 soil water suspension at 261 points across 79 sites. Results are summarised in Tables 6.15 and 6.16. In all soil groups, Horizon B1 has higher average pH than Horizon A. Group 5 has the highest average pH among soil groups and Group 6 has the lowest average pH among soil groups.

**Table 6.15 pH of Horizon A**

| Soil Group | No. of Points | pH (H <sub>2</sub> O) |      |      |      |            |      |      |
|------------|---------------|-----------------------|------|------|------|------------|------|------|
|            |               | Average               | Std  | Min  | Max  | Percentile |      |      |
|            |               |                       |      |      |      | 25         | 50   | 75   |

## 6.6 Organic Matter

Soil organic matter content of Horizons A and B1 was measured at 261 points across 79 sites. Results are summarised in Tables 6.17 and 6.18. In all soil groups, Horizon A has higher average organic matter than Horizon B1. Except Group 5, organic matter content of Horizon A showed a decreasing trend with soil groups.

**Table 6.17 Organic Matter of Horizon A**

| Soil Group | No. of Points | Organic Matter (%) |     |     |      |            |     |     |
|------------|---------------|--------------------|-----|-----|------|------------|-----|-----|
|            |               | Average            | Std | Min | Max  | Percentile |     |     |
|            |               |                    |     |     |      | 25         | 50  | 75  |

## 6.7 Exchangeable Cations

### (1) Calcium (Ca)

Soil exchangeable calcium (Ca) of Horizons A and B1 was measured at 261 points across 79 sites. Results are summarised in Tables 6.19 and 6.20. Group 5 has the highest average exchangeable Ca among soil groups.

**Table 6.19 Ca of Horizon A**

| Soil Group | No. of Points | Exchangeable Ca (meq/100g) |     |     |      |            |     |
|------------|---------------|----------------------------|-----|-----|------|------------|-----|
|            |               | Average                    | Std | Min | Max  | Percentile |     |
|            |               |                            |     |     |      | 25         | 50  |

## (2) Magnesium (Mg)

Soil exchangeable Mg of Horizons A and B1 was measured at 261 points across 79 sites. Results are summarised in Tables 6.21 and 6.22. Group 5 has the highest average exchangeable Mg among soil groups. Horizon B1 has higher average exchangeable Mg of soil group than Horizon A.

**Table 6.21 Mg of Horizon A**

| Soil Group | No. of Points | Exchangeable Mg (meq/100g) |     |     |      |            |     |
|------------|---------------|----------------------------|-----|-----|------|------------|-----|
|            |               | Average                    | Std | Min | Max  | Percentile |     |
|            |               |                            |     |     |      | 25         | 50  |

## (3) Sodium (Na)

Soil exchangeable Na of Horizons A and B1 was measured at 261 points across 79 sites. Results are summarised in Tables 6.23 and 6.24. Group 5 has the highest average exchangeable Na among soil groups. In each soil group, Horizon B1 has higher average exchangeable Na than Horizon A.

**Table 6.23 Na of Horizon A**

| Soil Group | No. of Points | Exchangeable Na (meq/100g) |     |     |     |            |     |
|------------|---------------|----------------------------|-----|-----|-----|------------|-----|
|            |               | Average                    | Std | Min | Max | Percentile |     |
|            |               |                            |     |     |     | 25         | 50  |
| 1          | 65            | 0.6                        | 0.5 | 0.0 | 3.4 | 0.4        | 0.5 |

#### (4) Potassium (K)

Soil exchangeable K of Horizons A and B1 was measured at 261 points across 79 sites. Results are summarised in Tables 6.25 and 6.26. Group 5 has the highest average exchangeable K among soil groups.

**Table 6.25 K of Horizon A**

| Soil Group | No. of Points | Exchangeable K (meq/100g) |     |     |     |            |     |     |
|------------|---------------|---------------------------|-----|-----|-----|------------|-----|-----|
|            |               | Average                   | Std | Min | Max | Percentile |     |     |
|            |               |                           |     |     |     | 25         | 50  | 75  |
| 1          | 65            | 0.6                       | 0.4 | 0.1 | 2.1 | 0.3        | 0.6 | 0.9 |

#### (5) Exchangeable Sodium Percentage (ESP)

ESP was determined by dividing exchangeable Na by the sum of the four cations (Ca, Mg, Na and K). Soil ESP of Horizons A and B1 was calculated for 261 points. Results are summarised in Tables 6.27 and 6.28. Group 2 has the highest average ESP of Horizon A and Group 5 has the highest average ESP of Horizon B1. In all soil groups, Horizon B1 has higher average ESP than Horizon A.

**Table 6.27 ESP of Horizon A**

| Soil Group | No. of Points | ESP (%) |     |     |      |            |     |     |
|------------|---------------|---------|-----|-----|------|------------|-----|-----|
|            |               | Average | Std | Min | Max  | Percentile |     |     |
|            |               |         |     |     |      | 25         | 50  | 75  |
| 1          | 65            | 6.2     | 5.3 | 1.3 | 31.3 | 3.5        | 4.5 | 6.0 |
| 2          | 84            | 7.9     | 3.6 | 2.0 | 22.3 | 6.0        | 8.1 | 9.3 |
| 3          | 57            | 6.9     | 4.7 | 1.5 | 25.5 | 3.6        | 5.6 | 8.6 |
| 4          | 26            | 6.1     | 5.6 | 0.5 | 23.0 | 2.0        | 4.1 | 7.8 |
| 5          | 12            | 7.1     | 3.4 | 2.9 | 13.6 | 4.3        | 7.3 | 9.2 |
| 6          | 17            | 5.1     | 1.8 | 1.8 | 7.6  | 3.8        | 5.8 | 6.5 |

**Table 6.28 ESP of Horizon B1**

| Soil Group | No. of Points | ESP (%) |     |     |      |            |      |      |
|------------|---------------|---------|-----|-----|------|------------|------|------|
|            |               | Average | Std | Min | Max  | Percentile |      |      |
|            |               |         |     |     |      | 25         | 50   | 75   |
| 1          | 65            | 7.2     | 5.7 | 1.6 | 32.8 | 4.4        | 5.6  | 7.6  |
