

Soil landform unit: FLP1; Floodplain, type 1, Murray River

Landform pattern	Floodplain
Elevation (m)	120-175
Annual rainfall (mm)	500-800
Geomorphic unit	4.1.1 Riverine Plain; Modern Floodplains; Meander Belt below Plain Level
Geology	Alluvium derived from Palaeozoic sediments, metasediments and igneous rocks

Locality diagram

Position in landscape

Landform component	1	2
Landform element	Flat; close to river	Flat; away from river
Slope range (%)	0-2	0-2
Site drainage	Poorly drained	Poorly drained
Rock outcrop	Nil	Nil
Soil description	Friable brown loams and brown light clays	Brown light clays and brown friable loams
Present land use	Grazing, Conservation, Recreation	Grazing, Conservation, Recreation
Susceptibility to erosion	Sheet and rill: Moderate	Sheet and rill: Low
	Gully: Moderate	Gully: Low
	Landslip: Low	Landslip: Low
	Wind: Low	Wind: Very low
Native vegetation	<i>Eucalyptus camaldulensis</i>	<i>E. camaldulensis</i>
