

Soil landform unit: FLP3; Floodplain, type 3, upper river valleys

| | |
|----------------------|--|
| Landform pattern | Floodplain, terraces |
| Elevation (m) | 140-350 |
| Annual rainfall (mm) | 700 - 1000 |
| Geomorphic unit | 1.3.5 Eastern Uplands; Ridges, Valleys and Hills; Valleys, Terraces and Floodplains, also 4.1.1 Riverine Plain; Modern Floodplains; Meander Belt Below Plain Level |
| Geology | Alluvium derived from Palaeozoic sediments, metasediments and igneous rocks |

Locality diagram

Position in landscape

| Landform component | 1 | 2 | 3 |
|---------------------------|---------------------------------|---|--|
| Landform element | Flat; lower reach floodplain | Flat; upper reach floodplain | Terrace flat |
| Slope range (%) | 0-2 | 0-6 | 0-2 |
| Site drainage | Moderately well drained | Moderately drained | Imperfectly drained |
| Rock outcrop | Nil | Nil | Nil |
| Soil description | Friable brown loams and earths | Friable brown loams and gradational soils | Brown, mottled, texture contrast/gradational soils |
| Present land use | Dairying, grazing, cropping | Dairying, grazing, cropping, horticulture | Dairying, grazing, cropping, horticulture |
| Susceptibility to erosion | Sheet and rill: Low | Sheet and rill: Low | Sheet and rill: Low |
| | Gully: Moderate | Gully: Moderate | Gully: Moderate |
| | Landslip: Low | Landslip: Low | Landslip: Low |
| | Wind: Very low | Wind: Very low | Wind: Very low |
| Native vegetation | <i>Eucalyptus camaldulensis</i> | <i>E. camaldulensis</i> , <i>E. ovata</i> | <i>E. camaldulensis</i> , <i>E. ovata</i> , <i>E. rubida</i> |
