

## **ACKNOWLEDGEMENTS**

Many people have assisted and provided valuable comments and advice in the preparation of this report. The authors would like to make special mention of the following people for their major contributions.

Mr J. N. Rowan provided valuable technical advice and played a major role in the development of the tables related to the processes of land deterioration. His meticulous review of the technical information in the report was greatly appreciated.

Mr Bryan Young was responsible for collating all sections of the report, but a special thanks must be given for his personal involvement, persistence and dedication to see this report in print. Miss Lyn Matthews prepared the block diagrams and figures. Mrs Lorraine Smith typed the many drafts of this report.

Information on the climate was provided by the Bureau of Meteorology, that on rivers and water storages by the Rural Water Commission and pasture-crop information by the Department of Agriculture and Rural Affairs.

Mrs Yvonne Roberts was the technical editor.
