

## **GENERAL DESCRIPTION**

Moderate slopes (5-10) on basalt with dark, heavy clayey soils. The soils are often shallow, with some areas of rock outcrop. Soils are moderately drained due to the slope.

## LAND ASSESSMENT

- A Erosion Risk with Land Disturbance
  - Class 2 Short slopes, fairly stable soil
- B Constraints on Construction
  - Class 3 Shallow soil over hard basalt
- C Effluent Disposal by Soil Absorption
  - Class 3 Very slow percolation rate
- D Small Farm Dams
  - Class 3 Shallow soil

## OVERALL ASSESSMENT FOR RURAL SUBDIVISION 2-10 ha (Considering A, B, C & D)

Class 3 Problems with rock & effluent disposal
