

**MAP UNIT**

**Grockworth drainage depressions**

**MAP SYMBOL GD**

### **GENERAL DESCRIPTION**

Drainage depressions and gullies. Occurring in the colluvial wash around the granite hills. Soils are deep sandy clays and may contain cemented layers.

### **LAND ASSESSMENT**

- A      Erosion Risk with Land Disturbance
  - Class 4-5      Concentrated Runoff, Gully erosion risk is high
- B      Constraints on Construction
  - Class 4      Rapid surface flows – requires drainage works
- C      Effluent Disposal by Soil Absorption
  - Class 5      Surface flows, flooding, pollution risk
- D      Small Farm Dams
  - Class 4      Too much catchment – spillway problems

### **OVERALL ASSESSMENT FOR RURAL SUBDIVISION 2-10 ha (Considering A, B, C & D)**

- Class 5      Rapid surface waterflows – flooding & pollution
