

# Statewide Crop Suitability

## Groundwater & Surface Water Resources

### LEGEND

-  Main Roads
-  River
-  Locality
- Water Quality**
-  High Quality (< 1000 mg/L)
-  Medium Quality (1000 - 3000 mg/L)
-  Low Quality (> 3000 mg/L)
-  Irrigation Areas

### Map Use Statement

This map has been prepared as part of a statewide analysis of land suitability for selected horticultural crops. The map should be used in conjunction with the associated report 'Land Suitability for Selected Horticultural Crops in Victoria' (1998).
