

Soil landform unit: LHG2: Low hills on granite, type 2, Shelley / Koetong / Yackandandah

Landform pattern Low hills
 Elevation (m) 200-500
 Annual rainfall (mm) 850-1000
 Geomorphic unit 1.3.4 Eastern Uplands; Ridges, Valleys and Hills; Enclosed Low Hills and Valleys
 Geology Silurian granite, minor metamorphics and derived colluvium and alluvium

Locality diagram

Position in landscape

Landform component	1	2	3
Landform element	Moderate rolling slopes	Gentle terrain	Flat
Slope range (%)	10-20	3-10	0-2
Site drainage	Well drained	Moderately well drained	Poor
Rock outcrop	Nil	Nil	Nil
Soil description	Gritty, red gradational, red and yellow texture contrast soils. Red soils are generally friable	Gritty, red gradational soil, friable	Grey brown loams
Present land use	Grazing	Grazing, dairying, horticulture	Grazing, dairying
Susceptibility to erosion	Sheet and rill: Moderate	Sheet and rill: Moderate	Sheet and rill: Moderate
	Gully: Moderate	Gully: Moderate	Gully: Moderate
	Landslip: Moderate	Landslip: Low	Landslip: Very low
	Wind: Moderate	Wind: Moderate	Wind: Low
Native vegetation	<i>Eucalyptus macrorhyncha</i> , <i>E. bridgesiana</i> , <i>E. polyanthemos</i> , <i>E. Blakelyi</i>	<i>E. macrorhyncha</i> , <i>E. bridgesiana</i> , <i>E. polyanthemos</i>	<i>E. macrorhyncha</i> , <i>E. Blakelyi</i>
