

**HYDROLOGICAL CHARACTERISTICS
OF SOILS RELEVANT TO
DRYLAND SALTING IN CENTRAL VICTORIA**

By

P. R. DYSON and J. J. JENKIN

CONTENTS

ABSTRACT.....	ii
1. INTRODUCTION	1
2. THE PHYSICAL ENVIRONMENT.....	3
2.1 Geology and soils.....	3
2.2 Climate and vegetation	8
2.3 Land use and deterioration.....	8
3. SECTION OF STUDY AREAS	11
4. HYDROLOGICAL CHARACTERISTICS OF THE SOILS	17
4.1 Bulk Density	17
4.2 Total porosity	17
4.3 Field Capacity	18
4.4 Macroporosity	18
4.5 Hydraulic conductivity.....	18
4.6 Soil Water	19
4.7 Electrical conductivity	20
4.8 Relationships.....	20
5. CONCLUSIONS AND PRACTICAL IMPLICATIONS	23
6. CREDITS AND ACKNOWLEDGEMENTS.....	24
7. REFERENCES	25

List of Tables

Figure 1 – Generalised geological map showing location of study areas.....	2
Figure 2(a) – Eppalock cleared catchment (No. 1): Soils and geology	4
Figure 2(b) – Eppalock cleared catchment (No. 1): Topography and drainage.....	5
Figure 3(a) – Eppalock forested catchment (No. 2): Soils and geology.....	6
Figure 3(b) – Eppalock forested catchment (No. 2): Topography and drainage	7
Figure 4 – Geological map of Kamarooka showing the study area.....	9
Figure 6 – Changes in soil water content with time for adjacent cleared and forested catchments (1980).....	21
