Coastal Acid Sulfate Soil Hazard
Portland T7221
Universal Transverse Mercator Zone 54

Catchment Management Authorities

ACID SULFATE SOIL
- No acid sulfate soils
- Shallowest than 1 m
  - Low acid sulfate soils
  - Moderate acid sulfate soils
  - High acid sulfate soils
- Deeper than 1 m
  - Low acid sulfate soils
  - Moderate acid sulfate soils
  - High acid sulfate soils

Information on acid sulfate soils
The information for the acid sulfate soil mapping is comprised of two separate sources:
1) The estimate of the extent that acid sulfate soil (either potential acid sulfate soil or actual sulfur) is most likely to occur. This is a calculated approximation and due to the scale of the mapping there may be areas outside the estimated regions that also have acid sulfate soils.
2) The site information has been analysed for the presence of oxidisable sulfur. These sites indicate only that point at which it is marked and may not truly represent the entire area in which it is located.

For more information, see the associated
Guidelines for the Use of Coastal Acid Sulfate Soil Hazard Maps for Victoria

Locality Map
Portland T7221
Universal Transverse Mercator Zone 54

Base data such as roads, rivers, public land (1:100 000) towns, CMA boundaries and Part 10.20 of the Catchment Management Act 2002 (CM Act) were sourced from the NRE Corporate Geospatial Data Library.
