

Soil landform unit: HSs1; Hills on metamorphic schist, type 1, Kiewa Valley

Landform pattern Hills
 Elevation (m) 200-500
 Annual rainfall (mm) 700-900
 Geomorphic unit 1.3.1 Eastern Uplands; Ridges, Valleys and Hills; High Dissected Ridges and Valley Relief
 Geology Ordovician metasediments (schists and minor gneiss) and associated colluvium and alluvium

Locality diagram

Position in landscape

Landform component	1	2
Landform element	Upper slopes and crests	Moderate mid slopes
Slope range (%)	0-32	0-20
Site drainage	Well drained	Rapidly drained
Rock outcrop	Nil	Nil
Soil description	Red texture contrast soils, stony loams	Red gradational soils, stony loams
Present land use	Grazing,	Grazing
Susceptibility to erosion	Sheet and rill: Low (slope <10%), Moderate (slope >10%) Gully: Moderate Landslip: Low Wind: Moderate	Sheet and rill: Low (slope <10%), Moderate (slope >10%) Gully: Moderate Landslip: Very low (slope <10%), Moderate (slope 10-20%) Wind: Moderate
Native vegetation	<i>Eucalyptus polyanthemos</i> , <i>E. goniocalyx</i> , <i>E. albens</i>	<i>E. polyanthemos</i> , <i>E. goniocalyx</i> , <i>E. albens</i>
