

**Soil landform unit: PMB; Plateaux associated with mountains <1220 m, Tertiary basalt**

Landform pattern      Elevated plateaux with broad crests, rises and low hills  
 Elevation (m)        650-1000  
 Annual rainfall (mm)   850-1350  
 Geomorphic unit      1.2.2 Eastern Uplands; Intermediate Elevation Landscapes; Plateau  
 Geology                Tertiary basalt overlying Lower Carboniferous sediments or Devonian rhyolite and rhyodacite

Locality diagram

Position in landscape

Landform component	1	2
Landform element	Hillcrest and moderate hillslopes	Broad crest or minor plateau
Slope range (%)	10-25	5-12
Site drainage	Well drained	Moderately well drained
Rock outcrop	Nil	Nil
Soil description	Red gradational soils on basalt or weakly bleached reddish brown gradational soils on sediments	Red gradational soils
Present land use	Grazing	Cereal cropping, potatoes and grazing
Susceptibility to erosion	Sheet and rill: High	Sheet and rill: Moderate
	Gully: Low	Gully: Low
	Wind: Very low	Wind: Very low
	Landslip: Moderate	Landslip: Moderate
Native vegetation	<i>Eucalyptus macrorhynca</i> , <i>E. polyanthemos</i> , <i>E.goniocalyx</i> , <i>E. melliodora</i>	<i>E.goniocalyx</i>
