

Soil landform unit: CLSy3; Colluvium derived from Tertiary sediments, type 3, Omeo West

Landform pattern	Plains, rises
Elevation (m)	670-750
Annual rainfall (mm)	600-650
Geomorphic unit	1.3.4 Eastern Uplands; Ridges, Valleys and Hills; Enclosed Low Hills and Valleys
Geology	Tertiary sediments

Locality diagram

Position in landscape

Landform component

1

Landform element	Gentle to moderate slopes
Slope range (%)	0-10%
Site drainage	Moderately well drained
Rock outcrop	Nil
Soil description	Red texture contrast soils, gravelly at depth
Present land use	Grazing
Susceptibility to erosion	Sheet: Moderate Gully: Moderate Landslip: Very low Wind: Moderate
Native vegetation	<i>Eucalyptus perriniana</i> , <i>E. stellulata</i> , <i>E. nitens</i>
