CONTENTS

Abstract	1
1 Introduction.....	1
2 Physical characteristics of the land	4
2.1 Climate.....	4
2.2 Geology and geomorphology	4
2.2.1 Geology	4
2.2.2 Geomorphology.....	8
2.3 Soil.....	8
2.4 Vegetation.....	11
3 Land classification	11
3.1 Methodology	11
3.1.1 General.....	11
3.1.2 Mapping in the western part of the Shire of Towong	12
3.1.3 Accuracy of the 1:100 000 land type map and land type descriptions..	13
3.2 Descriptions of physiographic regions.....	13
3.2.1 Flat to undulating plateaux	13
3.2.2 Dissected plateaux	14
3.2.3 Mountains and hills.....	14
3.2.4 Rolling hills	16
3.2.5 Low hills and undulating terrain.....	16
3.2.6 Active floodplains	17
4 Land type descriptions	18
4.1 Plateaux on granite and granodiorite, gneiss, rhyolite, schist and sedimentary rock	18
4.2 Mountains on granite	21
4.3 Mountains on leucocratic granite.....	25
4.4 Mountains on gneiss.....	28
4.5 Mountains on rhyolite and rhyodacite.....	31
4.6 Mountains on schist.....	34

4.7 Mountains on sedimentary rock	37
4.8 Hills on granite	40
4.9 Hills on gneiss	43
4.10 Hills on rhyolite and rhyodacite	46
4.11 Hills on schist	49
4.12 Hills on sedimentary rock.....	52
4.13 Rolling hills on gneiss.....	55
4.14 Low hills and undulating terrain in high landscape positions	58
4.15 Low hills and undulating terrain on granite, gneiss and derived colluvium and alluvium	61
4.16 Low hills and undulating terrain on schist, sedimentary rock and derived colluvium and alluvium	65
4.17 Active floodplains	68

List of Plates

1 Plateaux on granite and granodiorite.....	18
2 Mountains on granite.	21
3 Mountains on leucocratic granite.....	25
4 Mountains on gneiss.....	28
5 Mountains on rhyolite and rhyodacite.....	31
6 Mountains on schist.....	34
7 Mountains on sedimentary rock.....	37
8 Hills on granite.....	40
9 Hills on gneiss.....	43
10 Hills on rhyolite and rhyodacite.....	46
11 Hills on schist.....	49
12 Hills on sedimentary rock.....	52
13 Rolling hills on gneiss.....	55
14 Low hills and undulating terrain in high landscape positions.....	58
15 Low hills and undulating terrain on granite, gneiss and derived colluvium and alluvium.....	61
16 Low hills and undulating terrain on schist, sedimentary rock and derived colluvium and alluvium.....	65

17 Active Floodplains.....	68
----------------------------	----

List of Figures

1.1 Location of the Shire of Towong and study area.....	3
2.1 Climate: Predicted Annual Average Rainfall	5
2.2 Geology	7
2.3 Physiographic Regions.....	10

List of Tables

2.1 Summary of Geological Development	6
2.2 Physiographic Regions	9
4.1 Biophysical Characteristics: Flat to undulating plateaux: Map Symbols: PG, PGs, PR, PS and PSy.	19
4.2 Susceptibility of Land to Erosion: Map Symbols: PG, PGs, PR, PS and Psy	20
4.3 Biophysical Characteristics: Mountains on granite: Map Symbol: MG	22
4.4 Susceptibility of Land to Erosion: Map symbol: MG	24
4.5 Biophysical Characteristics: Mountains on lucogratitic granite: Map Symbol: MLG	26
4.6 Susceptibility of Land to Erosion: Map Symbol: MLG.....	27
4.7 Biophysical Characteristics: Mountains on Gneiss: Map Symbol: MGs	29
4.8 Susceptibility of Land to Erosion: Map Symbol: MGs.....	30
4.9 Biophysical Characteristics: Mountains on rhyolite and rhyodacite: Map Symbol: MR	32
4.10 Susceptibility of Land to Erosion: Map Symbol: MR.....	33
4.11 Biophysical Characteristics: Mountains on schist: Map Symbol: MS	35
4.12 Susceptibility of Land to Erosion: Map Symbol: MS	36
4.13 Biophysical Characteristics: Mountains on sedimentary rock: Map Symbol MSy.....	38
4.14 Susceptibility of Land to Erosion: Map Symbol: MSy	39
4.15 Biophysical Characteristics: Hills on granite: Map Symbol: HG, HG-DP.....	41
4.16 Susceptibility of Land to Erosion: Map Symbol: HG, HG-DP	42
4.17 Biophysical Characteristics: Hills on gneiss: Map Symbol: HGs	44
4.18 Susceptibility of Land to Erosion: Map Symbol: HGs	45

4.19 Biophysical Characteristics: Hills on rhyolite: Map Symbols: HR, HR-DP	47
4.20 Susceptibility of Land to Erosion: Map Symbol: HR, HR-DP	48
4.21 Biophysical Characteristics: Hills on schist: Map Symbol: HS	50
4.22 Susceptibility of Land to Erosion: Map Symbol: HS	51
4.23 Biophysical Characteristics: Hills on sedimentary rock: Map Symbols HSy-DP, HSy	53
4.24 Susceptibility of Land to Erosion: Map Symbols: HSy-DP, HSy	54
4.25 Biophysical Characteristics: Rolling hills on gneiss: Map Symbol: RHGs	56
4.26 Susceptibility of Land to Erosion: Map Symbols: RHGs	57
4.27 Biophysical Characteristics: Low hills and undulating terrain in high landscape positions: Map Symbol: LHUH	59
4.28 Susceptibility of Land to Erosion: Map Symbols: LHUH	60
4.29 Biophysical Characteristics: Low hills and undulating terrain on granite, gneiss and derived colluvium and alluvium: Map Symbol LHUG	62
4.30 Susceptibility of Land to Erosion: Map Symbols: LHUG	64
4.31 Biophysical Characteristics: Low hills and undulating terrain on schist, sedimentary rock and derived coluvium and alluvium: Map Symbol: LHUS	66
4.32 Susceptibility of Land to Erosion: Map Symbols: LHUS	67
4.33 Biophysical Characteristics: Active Floodplains: Map Symbol: A	69
Acknowledgments	70
References	70
Appendices	
1 Sources of information and notes on methodology for data in land type tables	72
2 Notes on assessment of susceptibility of land types to deterioration	76
3 Laboratory data for selected soil profiles	82
3a Chemical laboratory results	90
3b Physical laboratory results	91
Maps	at end of report
Index and key to Land Type maps for the shire of Towong – Western Part (1:500 000).	
Maps 1 – 8 Land Types of the shire of Towong – Western Part (1:100 000).
