

Soil Conservation and Land Utilization Act 1958.

NOTICE IN RESPECT TO CHANGES IN LAND USE IN A SPECIFIED PART OF THE CAIRN CURRAN WATER SUPPLY CATCHMENT, (PROCLAIMED 29TH MAY, 1962 "VICTORIA GOVERNMENT GAZETTE", No. 54, DATED 30TH MAY, 1962.)

Notice is hereby given that the Soil Conservation Authority in pursuance of its power under the Soil Conservation and Land Utilization Act 1958, as amended, has specified the changes in land use which may not be made without the prior approval of the Authority, in a specified part of the Cairn Curran Water Supply Catchment as defined on Plan No. 2596, the original of which is filed at the Head Office of the Soil Conservation Authority at 378 Cotham Road, Kew.

The changes in land use which may not be made without the prior approval of the Soil Conservation Authority are:

1. The clearing of timbered land, the construction of roads, the clearing or trenching of easements, the carrying on of any extractive industry, the building of dams in excess of 1,600 cubic yards capacity or a wall height of 8 feet.
2. The ploughing or cultivation of land within two chains of the edge of the banks of streams, creeks or watercourses for a distance of twenty chains upstream from the fully supply level of the reservoir and upstream from that point within one chain from the edge of the banks of such streams, creeks or watercourses.
3. The subdivision of rural land into allotments for uses to which hitherto it has not been put, or into allotments of a size which when developed may result in the deterioration of the soil and/or the quality and purity of the water in the reservoir and streams within the catchment thereof, or all subdivisions of land to create allotments of less than sixty (60) acres within area.
4. The establishment of feed-lots, piggeries, poultry farms or any other industry which will discharge effluent within the specified area.
5. In respect to an existing use of land, the construction or change of location or addition to any building or a change in any industry which will result in an increase in the rate of discharge, or the discharge, of effluent to the specified area.

Dated 4th February, 1972

P. J. McCALLUM

Secretary
