

ACKNOWLEDGEMENTS

The help of many people who assisted in the preparation of this report is acknowledged. In particular, Miss Penny Fisher who assisted in the field work and undertook the laboratory analysis of soils.

The assistance of Mr. Grant Boyle and Mrs. June Bowman, who also assisted with the typing, for their work in determining the permeability of soil profiles was greatly appreciated.

Thanks are also extended to the following people for their contribution. Mr. Keith Reynard who scanned/digitized map unit boundaries into a Geographic Information System and incorporated base map information. Information on the climate was provided by the Bureau of Meteorology and compiled by Mr. Mike Austin.

A special thanks is extended to Mr. Dermot McKane for his contributions in the initial stages of the report, and to Mr. Les Russell who provided comments and advice throughout its preparation. The hard work of Mrs. Linda Hewlett who typed the report is gratefully acknowledged.
