

A LAND CAPABILITY STUDY OF THE RURAL CITY OF MARONG

April 1993

CENTRE FOR LAND PROTECTION RESEARCH

Technical Report No. 7

E.J. Bryant and M.S. Lorimer

ISBN No. 0 7306 2577 X
ISSN No. 1038 216X

Land & Catchment Protection Branch
Department of Conservation & Natural Resources

The information in this report is for broad-scale planning. It should be noted that the mapping scale in this study has necessitated some generalizations; the ratings and conclusions are based on information that has been derived from a limited number of representative sites. Site specific data may be required for detailed planning.

The precision of mapped boundaries is affected by the scale of the map. Any enlargement of the map will distort information and is unlikely to improve its accuracy.

Bryant, E. (Emma).

A Land capability study of the Rural City of Marong.

Bibliography. Includes index.

CONTENTS

1.	INTRODUCTION.....	1
1.1	Introduction.....	1
1.2	Location.....	1
1.3	Purpose of Study	2
1.4	Objectives.....	2
2.	LAND CAPABILITY ASSESSMENT	3
2.1	Philosophy and principles	3
2.2	Land resource mapping - methodology and constraints	3
2.3	Assessment.....	4
2.4	Land Capability Rating Tables.....	6
3.	LAND MANAGEMENT GUIDELINES	12
3.1	Management of land characteristics that influence land use.....	12
3.1.1	Soil texture	12
3.1.2	Boulders and rock outcrop	12
3.1.3	Depth to hard rock.....	12
3.1.4	Depth of topsoil.....	12
3.1.5	Depth to watertable (seasonal, perched, permanent)	12
3.1.6	Dispersible clays	13
3.1.7	Flooding	13
3.1.8	Organic matter.....	13
3.1.9	Permeability	13
3.1.10	Plasticity Index.....	14
3.1.11	Linear shrinkage (shrink-swell potential)	14
3.1.12	Site drainage.....	14
3.1.13	Slope.....	14
3.1.14	Soil reaction	14
3.1.15	Stones and gravel	14
4.	DETAILED MAP UNIT DESCRIPTIONS AND CAPABILITY RATINGS.....	15
5.	DESCRIPTION OF THE ENVIRONMENT.....	93
5.1	Geomorphology.....	93
5.1.1	Sedimentary gently undulating rises/rolling low hills	93
5.1.2	Sedimentary rolling hills	95
5.1.3	Granodiorite undulating rises/low hills/rolling hills	95
5.1.4	Tertiary sediments gently undulating rises	97
5.1.5	Tertiary fans gently undulating rises/undulating low hills/undulating hills.....	97
5.1.6	Basaltic undulating plain.....	97
5.1.7	Alluvial plain.....	97
5.1.8	Alluvial terraces	97
5.2	Soils.....	99
5.2.1	Sedimentary gently undulating rises/rolling low hills/rolling hills.....	99
5.2.2	Granodiorite undulating rises/low hills/rolling hills	100
5.2.3	Tertiary sediments gently undulating rises	104
5.2.4	Tertiary fans gently undulating rises/undulating low hills/undulating hills.....	104
5.2.5	Basaltic undulating plain.....	106
5.2.6	Alluvial plain.....	106
5.2.7	Alluvial terraces	110
5.3	Climate	111
5.3.1	Temperature	111
5.3.2	Rainfall.....	113
5.3.3	Effective rainfall and evapotranspiration	113

5.3.4	Length of growing season	114
5.3.5	Frost.....	114
5.3.6	Wind.....	115
5.4	Native vegetation	117
5.4.1	Sedimentary undulating rises/rolling low hills/hills	117
5.4.2	Granodiorite undulating rises/low hills/rolling hills	118
5.4.3	Tertiary sediments gently undulating.....	118
5.4.4	Tertiary fans gently undulating rises/undulating low hills/undulating hills.....	118
5.4.5	Basaltic and alluvial plains.....	118
5.4.6	Alluvial terraces	119
5.4.7	Significant areas/species rises	119
5.5	Land degradation: incidence and susceptibility	119
5.5.1	Dryland salinity.....	119
5.5.2	Sheet erosion	121
5.5.3	Gully erosion.....	121
5.5.4	Mass movement	121
5.5.5	Wind erosion	122
5.5.6	Soil structure decline.....	122
5.5.7	Soil acidification	122
5.6	Existing land uses.....	122
5.6.1	Public land.....	122
5.6.2	Forestry	123
5.6.3	Mining	123
5.6.4	Grazing	123
5.6.5	Cropping.....	123
5.6.6	Poultry	125
5.6.7	Viticulture	125
5.6.8	Recreation	125
5.6.9	Residential development	125
5.6.10	Others	126
5.7	Land systems	127
6.	ACKNOWLEDGEMENTS	129

	GLOSSARY.....	158

APPENDIX

APPENDIX 1 - NOTES TO ACCOMPANY LAND CAPABILITY RATING TABLES.....	132
1. Total amount of water available to plants	132
2. Bearing capacity.....	132
3. Coarse fragment sizes	132
4. Linear Shrinkage	132
5. Condition of the topsoil.....	132
6. Depth to hard rock or impermeable layer	133
7. Depth to seasonal watertable.....	133
8. Depth of topsoil.....	133
9. Dispersibility	134
10. Drainage	134
11. Electrical conductivity ($\mu\text{S cm}^{-1}$)	134
12. Flooding risk	134
13. Length of growing season	134
14. No. of months/yr when average daily rainfall $> K_{\text{sat}}$	135
15. Permeability of a soil profile (It).....	135
16. Index for permeability - rainfall.....	136
17. Rock outcrop	136
18. Slope.....	136
19. Susceptibility to gully erosion.....	136
20. Susceptibility to slope failure.....	138
21. Susceptibility to sheet/rill erosion by water	138
22. Suitability of subsoil	138
23. Susceptibility to erosion by wind (Lorimer 1985)	140
24. Transpiration beds	140
APPENDIX 2 - WORKING TABLES FOR LAND CAPABILITY RATINGS.....	141
2.1 Farm Dams	141
2.2 Secondary Roads	142
2.3 Effluent Disposal.....	143
2.4 Building Foundations i) slab, ii) stump.....	144
2.5 Agriculture	145
2.6 Rural Residential Development	146
2.7 Urban Residential Development i) Slab; ii) Stumps	147
APPENDIX 3 - SPECIFIC METHODOLOGY	148
3.1 Map Unit Determination	148
3.2 Field Observations	148
3.3 Field Tests	148
3.4 Laboratory Analysis	148
APPENDIX 4 - PHYSICAL AND CHEMICAL LABORATORY RESULTS	152
APPENDIX 5 - CRITERIA USED FOR ESTABLISHING RECHARGE VALUES.....	155
APPENDIX 6 - BOTANICAL LIST	156

List of Tables

Table 1.1 - Summary of land capability ratings.....	ix
Table 2.1 - Land Capability Classes	5
Table 2.2 - Land capability assessment for agriculture.....	7
Table 2.3 - Land capability assessment for on-site effluent disposal	8
Table 2.4 - Land capability assessment for building foundations.....	9
Table 2.5 - Land capability assessment for earthen dams.....	10
Table 2.6 - Land capability assessment for secondary roads	11
Table 5.1 - Geological history.....	92
Table 5.2 - Simple types of erosion landform pattern characterised by relief and modal slope	95
Table 5.3 - The mean maximum, minimum and average monthly temperatures for Bendigo	112
Table 5.4 - Average monthly and yearly rainfall and number of rain days for Bendigo, Laanecoorie and Raywood.....	113
Table 5.5 - The mean maximum, minimum and average frost occurrences for Bendigo....	114
Table 5.6 - Percentage occurrence of mean monthly wind speeds for Bendigo	117
Table 5.7 - Comparisons of scale and detail in land inventory studies.....	128
Table A1 – Available Water Capacity	132
Table A2 - The effects of electrical conductivity on plant growth	134
Table A3 - Permeability characteristics of a soil profile.....	135
Table A4 - Index for permeability/rainfall.....	136
Table A5 - Susceptibility to gully erosion	137
Table A6 - Susceptibility to slope failure	138
Table A7 - Suitability of subsoil for earthen dams	138
Table A8 - Erodibility of topsoils	139
Table A9 - Susceptibility to Sheet/Rill Erosion*.....	140
Table A10 - Soil erodibility	140

List of Plates

Plate 1: Red duplex soil, map units Osc/Ose/Osf	102
Plate 2: Yellow duplex soil, map unit Osd.....	102
Plate 3: Yellow duplex alluvial soil, map unit Osg.....	102
Plate 4: Uniform stony loam, map units Osa/Osb.....	102
Plate 5: Greyish brown gradational soil, map unit Osc.....	103
Plate 6: Uniform coarse sand, map units Dga/Dgb/Dgc	103
Plate 7: Alluvial coarse sands, amp units Dgg	103
Plate 8: Yellow duplex soil, map units Dgc/Dgd/Dge/Dgf/Dgg.....	103
Plate 9: Red duplex soil, map units Tsfl/Tsdl/Tsg1	105
Plate 10: Yellow duplex soil, map unit Tsf2.....	105
Plate 11: Red duplex soil, map units Tffl/Tfel.....	105
Plate 12: Red duplex soil, map unit Qbf	105
Plate 13: Yellow duplex soil, map unit Qbg	108
Plate 14: Red uniform clay loam, map unit Qbd/Qbr	108
Plate 15: Red duplex soil, map unit Qap.....	108
Plate 16: Yellow brown gradational soil, map unit Qag	108
Plate 17: Loddon River uniform loam, map unit Qa2.....	109
Plate 18: Bullock Creek uniform clay loam/loam, map unit Qa3	109
