

Soil landform unit: PMV; Plateaux on Devonian rhyolite and rhyodacite mountains <1220 m, Toombullup

Landform pattern Undulating plateau
 Elevation (m) 650-900
 Annual rainfall (mm) 1000-1250
 Geomorphic unit 1.2.2 Eastern Uplands; Intermediate Elevation Landscapes; Plateau
 Geology Upper Devonian rhyolite and rhyodacite

Locality diagram

Position in landscape

Landform component	1	2	3
Landform element	Crest and moderate hill slopes	Gentle hill slopes or undulating plains	Drainage depression (minor; no component description available)
Slope range (%)	8-20	5-12	5-15
Site drainage	Rapidly drained	Moderately well drained	Poorly drained
Rock outcrop	Commonly rocky	Commonly rocky	Slightly rocky
Soil description	Reddish brown loam soils on exposed slopes or friable red gradational soils on sheltered slopes	Reddish brown loam soils on exposed slopes or friable red gradational soils on sheltered slopes	Weakly bleached yellowish brown gradational soils
Present land use	Conservation, forestry, grazing	Conservation, forestry, grazing	Conservation, forestry, grazing
Susceptibility to erosion	Sheet: Low	Sheet: Low	Sheet: Low
	Gully: Low	Gully: Low	Gully: Low
	Landslip: Low	Landslip: Low	Landslip: Low
	Wind: Very low	Wind: Very low	Wind: Very low
Native vegetation	<i>Eucalyptus radiata</i> , <i>E. rubida</i> , <i>E. dives</i> , <i>E. obliqua</i>	<i>E. radiata</i> , <i>E. rubida</i> , <i>E. st-johnii</i>	<i>E. radiata</i> , <i>E. st-johnii</i> , <i>E. camphora</i>
