

Soil landform unit: LHG1: Low hills on granite, type 1, Benambra North / Limestone Road

Landform pattern Undulating low hills
 Elevation (m) 500-1100
 Annual rainfall (mm) 650-1200
 Geomorphic unit 1.3.4 Eastern Uplands; Ridges, Valleys and Hills; Enclosed Low Hills and Valleys
 Geology Silurian granite and associated colluvium

Locality diagram

Position in landscape

Landform component	1	2
Landform element	Undulating upper and mid slopes	Flat or drainage depression
Slope range (%)	3-15	1-5
Site drainage	Moderately well drained	Poorly drained
Rock outcrop	Nil	Nil
Soil description	Brown/yellow texture contrast soil and grey coarse loams	Grey and yellow texture contrast soil (sodic)
Present land use	Grazing	Grazing
Susceptibility to erosion	Sheet and rill: Moderate	Sheet and rill: Moderate
	Gully: Moderate	Gully: Moderate
	Landslip: Moderate	Landslip: Very low
	Wind: Moderate	Wind: Low
Native vegetation	<i>Eucalyptus dives</i> , <i>E. radiata</i> , <i>E. blakelyi</i>	<i>Eucalyptus dives</i> , <i>E. radiata</i> , <i>E. blakelyi</i>
