

MAP UNIT

Volcane gentle to moderate slopes

MAP SYMBOL VG

GENERAL DESCRIPTION

Slopes of 5-10% near volcanic hills. Soils are red (or brown) duplex soils with heavy clay subsoils. The soils are moderately well drained due to the rolling topography.

LAND ASSESSMENT

- A Erosion Risk Associated with Land Disturbance
 - Class 2 Fallow wash can be moderately serious (fertile soil)
- B Constraints on Construction
 - Class 3 Shrink-swell soil, shallow soils are common
- C Effluent Disposal by Soil Absorption
 - Class 3 (2) Slow percolation rate in the clayey subsoil
- D Small Farm Dams
 - Class 2 Rock

OVERALL ASSESSMENT FOR RURAL SUBDIVISION 2-10 ha (Considering A, B, C & D)

- Class 2 (3) Large systems for Effluent Disposal (Good cropping land)
